EXPERIENCE

Software Engineer (IV)

Cisco Systems (CX) — San Jose, CA

March 2019 - October 2021

- Built dynamic, responsive user interfaces using leading frameworks (React, Angular, Vue), emphasizing performance and accessibility.
- Designed and implemented RESTful APIs with Node (Express, Nestjs), ensuring seamless data flow and integration with frontend applications,.
- Led the successful migration of all existing and future applications from OpenStack to AWS, streamlining infrastructure management while improving system scalability and performance.
- Automated CI/CD pipelines using Jenkins and CircleCI, streamlining deployment processes and ensuring faster, more reliable releases.
- Implemented a dynamic feature flag system, enabling efficient feature rollouts and reducing deployment risks

Software Engineer (Contract)

Cisco Systems (CTAO) — San Jose, CA

March 2015 - March 2019

- Developed and documented reusable UI components with Storybook, in collaboration with UX designers, to ensure consistency across applications
- Created interactive data visualizations using D3.js, transforming complex datasets into clear, actionable insights
- Unit tests via Jest, end-to-end testing via Cypress
- Research projection mapping techniques using Microsoft RoomAlive, Kinect, and SharpDX/DirectX
- Prototype shaping content through augmented reality using Unity3D and Apple ARKit

Software Engineer (Contract)

Paypal — San Jose, CA

June 2014 - March 2015

- Rapid prototyping of merchant facing account pages using NodeJS, BackboneJS, RequireJS, LESS, DustJS
- Partnered closely with design & product to craft great product experiences through usability testing
- End to End testing using PayPal's open source automation framework,

SKILLS

JavaScript/ TypeScript
