Full stack Software Engineer with 8+ years of experience building user focused web applications across SaaS platforms. Skilled in the full software development lifecycle, with a focus on clean, maintainable code, UI best practices, and collaborative, iterative development. Emphasis given for responsive design principles and adhering to WCAG 2.2 Level AA accessibility standards.

PROFESSIONAL EXPERIENCE

Cisco Systems (CX)

Mar. 2019 - Oct. 2021

Software Engineer IV

San Jose, CA

- Built dynamic, responsive user interfaces using leading frameworks (React, Angular, Vue) emphasizing performance and accessibility
- Designed and implemented RESTful APIs with Node (Express, Nestjs) to ensure seamless data flow and integration with frontend applications
- Led the successful migration of all existing and future applications from OpenStack to AWS, simplifying infrastructure management while improving system scalability and reliability
- Automated CI/CD pipelines using Jenkins and CircleCI to streamline deployment processes and ensure faster, more robust releases.
- Implemented a dynamic feature flag system, enabling efficient feature rollouts and reducing deployment risks

Cisco Systems (CTAO)

Mar. 2015 - Mar. 2019

Software Engineer (Contract)

San Jose, CA

- Developed and documented reusable UI components using Storybook in collaboration with UX teams to ensure consistency and accessibility across platforms.
- Created interactive data visualizations using D3.js, transforming complex datasets into clear, actionable insights
- Maintained strong test coverage with Jest and Cypress, embedding testing best practices into the development process and supporting high product stability through CI integration.
- Participated in cross functional planning meetings to define system workflows, ensure SDLC compliance, and uphold code maintainability standards.

Paypal

Jun. 2014 - Mar. 2015

Software Engineer (Contract)

San Jose, CA

- Rapidly prototyped merchant facing interfaces using Node.js, BackboneJS, and RequireJS, refining designs based on usability testing and product feedback.
- Delivered performant, secure frontend solutions in coordination with backend engineers using RESTful services built on Java Spring.
- Drove unit and integration testing through Mocha, Chai, SinonJS, and NemoJS, ensuring consistent and bug free deployment to production systems.

EDUCATION

San Jose State University

San Jose, CA

Bachelor of Science, Computer Science

SKILLS

Languages: Typescript, Javascript (ES6+), HTML5, CSS3, SQL
Frontend: React, Angular, Vue, D3.js, Storybook, Webpack, Babel, Responsive design
Backend: Node.js, Express, NestJS, RESTful APIs, PostgreSQL, MySQL GraphQL, data modeling
Testing: Jest, Cypress, Mocha, Chai, Sinon, Test driven development
DevOps: Docker, Jenkins, CircleCI, Github
Infra: Amazon Web Services (EC2, ECS, S3), OpenStack, Google Cloud Platform
